

L14 - Vacpack Backpack

“Vacpack” compactable backpack.

Equipped with an air suction system, allowing its storage capacity to be optimized using the pump provided. The reduction in volume reaches around 50% and thus allows you to travel without additional cabin baggage (depending on the airlines).

Possibility of having a 10,000 mAh powerbank (optional) and a 3in1 light cable integrated into the bag and allowing you to recharge your favorite devices at any time.

It has 3 storage compartments, 1 of which is padded for a laptop. Multiple additional pockets (at the back and shoulder strap) make it easier to store your personal belongings.

Everything is included: pump, marking on metal plate, non-woven storage pouch and 3-year warranty.
